Presents

Nursing Summit on Environmental Health: *Preparing Nurses for Critical Environmental Health Issues*

SHERATON SAN DIEGO HOTEL & MARINA | SAN DIEGO, CALIFORNIA | MAY 6-7, 2018

The Nursing Summit is a CleanMed pre-conference event, starting on Sunday, May 6 going through the morning of Monday, May 7. CleanMed begins Monday afternoon, May 7 running through Wednesday, May 9.

From pollution caused by hospitals, to chemicals in our food and products, to preparing for disasters, environmental issues challenge the health of nurses, and the patients and communities we care for. Over 3 million nurses practice in the US. However, not all recognize the importance of understanding the effects of environmental issues on health, especially in busy practice settings in hospitals and clinics. College of Nursing curricula do not always include in-depth environmental health content, nor do nurses always have access to continuing education in environmental health. The Nursing Summit on Environmental Health will provide both content on critical issues, and practical steps for nurses and non-nurses to take. This lively, interactive event will be content rich, offer great networking, and will send nurses home with tools to use to create a healthier planet and therefore healthier people. **Join us!**

The summit cost is \$129 (includes dinner on Sunday and breakfast on Monday).

Deep discounted CleanMed rates are available to summit attendees.

Nursing Sessions at CleanMed 2018

MONDAY, MAY 7 | 3:30 P.M. - 4:45 P.M.

(A-10) Climate Change is a Nursing Issue: How Engaging Nurses Can Help Meet Your Organization's Climate Goals

Come hear about three different ways nurses are working to reduce the health impacts of climate change inside and outside their facilities. You'll also learn about an exciting new campaign that will provide nurses with the tools and resources they need to be leaders in climate action.

TUESDAY, MAY 8 | 10:15 A.M. - 11:30 A.M.

(B-4) Become a Clinician Climate Advocate: Use your Trusted Voice for Change

This interactive workshop will provide clinicians with the skills and resources needed to influence policy makers, communicate effectively, and engage the media.

(B-10) Nurses as Inspired Change Makers: Exemplars in Sustainable Foods

In this session, you'll learn how nurses can help ensure our most vulnerable populations receive foods that are healthy, nutrient dense, and produced in a way that is also safe for the environment.
