

Dear Acting Administrator Wheeler,

As nurses and nursing students we strongly oppose any proposal that eliminates or weakens current clean car standards as these are essential public health safeguards.

In 2015, the U.S. Environmental Protection Agency (EPA) deemed the latest fuel economy standards to be economical, feasible, and beneficial to consumers and they should be continued.

Cleaner, more efficient vehicles reduce air pollution and combat climate change -- helping to prevent harmful health impacts like asthma attacks. Rolling back health protective clean car standards will allow automakers to make dirtier cars that pollute our air, harm our health, and worsen climate change in addition to having significant negative economic impacts on American Families.

Sincerely,

Dennette Marks	Fairbanks	AK
